Document 3 – All-breed health tests required for a breeder to get a breeding license from his/her NCO

COUNTRY	Test (name + possible comments)
BAHRAIN	<p>The Bahrain Kennel Club (BKC) is doing regular kennel inspection to make sure that all our registered breeders are keeping their dogs in a healthy clean environment. If they are not keeping the BKC Standard requirements, the BKC will give a warning and suspend their breeding until the breeder has rectified the fault(s).</p> <p>The inspection is done by one of our representative and an independent veterinarian. The veterinarian will check the health and welfare and the BKC representative will make sure the dogs are up to FCI breed standard. E.g.: if any faults are found, we suspend that dog/bitch from breeding.</p>

COUNTRY	Test (name + possible comments)
SWEDEN	All hips, eyes, and patella results are registered for all breeds. All health, DNA and mentality assessments results can be found online at <a href="http://skk.se">skk.se</a> In Sweden there are approximately 85 % of all purebred dogs registered in Swedish Kennel Club, in some breeds

COUNTRY	Test (name + possible comments)
THE NETHERLANDS	<p>The Dutch Kennel Club hopes to implement a breeding strategy before the end of this year (2020) consisting of: Cambridge BOAS test, RFG scheme for the Bulldog, French Bulldog and Pug. The other breeds need to get a different exercise tolerance test/respiratory grading, at least until these breeds are also validated for the Cambridge BOAS test.</p> <p>A veterinarian will objectively test/measure:</p> <ul style="list-style-type: none"> <li>o Breathing sounds, while the animal is in rest (no abnormal sounds allowed)</li> <li>o Nostrils, only open nostrils are allowed</li> <li>o Nasal fold, none or without contact to the eye</li> <li>o No bulging of the eye, the sclera should be visible in only one quadrant (or less). The dog should not be</li> <li>o Eyelid closure is possible</li> <li>o Body condition score, obese animals should not be used for breeding</li> </ul> <p>Patellar luxation test with fair results</p> <hr/> <p>The above-mentioned measures will be implemented after a thorough juridical and scientific scrutiny. At the A covenant will make sure all the breeders know which additional conditions need to be met, before the Dutch Kennel Club can produce the pedigrees for the offspring.</p> <p>We have agreed on a 10-step procedure to these covenants:</p> <ul style="list-style-type: none"> <li>o Breed specific breeding rules</li> <li>o Scientific examination</li> <li>o Legal examination</li> <li>o Pedigrees</li> <li>o Limited registration</li> <li>o Cambridge University BOAS test</li> <li>o Licence</li> <li>o Veterinarians</li> <li>o Benchmark</li> <li>o Communication</li> </ul> <p>The aim is to prove the breeding has been done with a best effort obligation. Breeding in the Netherlands for</p>
