  - *Q: Suggestion is to remove word " qualified" or describe it in details.*
  - A: It is necessary for a smooth running of a test to have at least 1 qualified person to assist the judge.
  
- ▶ “Therefore, the DH has to provide proof of insurance for...”
  - *Q: Since some countries these proof of insurance is not possible to obtain we suggest to add that dog handler declares that he will pay all damage caused either by himself or his dog.*
  - A: The IPO-R protects the organizer by demanding a proof of insurance. The dog handler has the legal responsible for his dog and himself all time throughout the whole test a all working places! At the end is in the responsibility of the organizer to get a signed disclaimer and take risk of not demanding insurance proof. (same sentence in IGP!)

## Chapter 3 – Questions IPO–R

- ▶ “2.6.2 Termination - When a phase has been terminated, this phase is considered as not passed. The points awarded up to this point will be recognized, minus an obligatory deduction of 61 points in phase A and 31 points in phase B, and the participant starts, as far as still required, in the next phase of his test.”
  - *Q: It would be more clear to understand how points deduction is done if the points would be dedicated in strictly this amounts always in case of termination.*
  - A : Sometimes , if termination is nearly at the end of a phase, and all awarded points are added, it could reach the minimum points needed. But, a terminated phase always leads to unsatisfactory. Therefore, in anycase, a mandatory deduction is stated, regardless what would have been reached up till this time of termination.
